

FOR IMMEDIATE RELEASE

Integrated Document Technologies (IDT) Joins ProStor Systems Value-Added Reseller Program

Itasca, IL — January 5th, 2010 - Integrated Document Technologies, Inc. (IDT) is pleased to announce it has become an authorized reseller for ProStor Systems and to add ProStor Systems' feature rich product line to its portfolio of Enterprise Content Management, Enterprise Resource Planning and Customer Relationship Management solution offerings. The addition of ProStor InfiniVault® provides industry-leading, high capacity storage solutions for the cost-effective, long-term storage of digital information.

Paper documents converted into document images, ERP/Financial data, healthcare information, etc. continue to grow at an enormous rate and the need for a well architected storage solution is an absolute requirement in businesses today. Tape and optical solutions simply can't deliver the reliability and scalability at a price point that is acceptable in the marketplace anymore.

"With the addition of ProStor InfiniVault to our product and service line offerings, IDT can continue to provide our broad base of mid-market and enterprise customers a unique storage solution that provides both high capacity WORM and re-writable technology at a price point unmatched in the industry," said Paul E. Szemplinski, President and CEO.

The other innovative feature of the ProStor InfiniVault is the RDX® removable disk interface which has widespread adoption across so many hardware manufacturers. With the media form factor being so rugged and compact, the removable aspect of the RDX media is very attractive and practical compared to that of the alternative storage media technologies available in the marketplace today.

"We are pleased to have IDT on board as a reseller. IDT is very well-respected in the ECM, ERP and CRM industries," said Jim Zigmant, Sales Director for ProStor Systems. "Over the past 17 years they have solidly established themselves in the financial services vertical but also in manufacturing, healthcare, and more. We are pleased to have the opportunity to combine our data storage technologies and expertise with their extensive business process knowledge," Zigmant added.

About Integrated Document Technologies, Inc.

Integrated Document Technologies (IDT) helps companies harness the power of information through integrated ECM, ERP and CRM solutions. It offers system design consulting and a comprehensive range of products and services to reduce paper, automate business processes and enable regulatory compliance. IDT is your single-source knowledge base for system design, integration, customization, implementation and long-term support. IDT maintains a broad client base that includes government and state agencies, life sciences and health care, manufacturing and distribution companies, and financial services and insurance organizations.

About ProStor Systems

ProStor Systems provides industry-leading solutions for the cost-effective, long-term storage of digital information. ProStor's RDX® removable disk technology is sold by leading server manufacturers Dell, HP, IBM, and others who combined have shipped over 70 petabytes to 150,000 customers worldwide. ProStor InfiniVault® is the most cost-effective storage system for the long-term retention of data and images. ProStor InfiniVault integrates information management software, online disk, and RDX removable disk to simplify retention management while automating disaster protection and regulatory compliance. This intelligent storage system is replacing optical, tape, and disk in healthcare, document imaging, financial services, digital video archive, service provider, and government markets.
