

Integrated Document Technologies, Inc. (IDT) Named Premier Solutions Reseller by Kodak

Itasca, IL. – April 18, 2006

Integrated Document Technologies, Inc. (IDT), an established provider of services and solutions for integrated Content Management, Enterprise Resource Planning and Customer Relationship Management solutions for organizations of all sizes announced that it has been named a Premier Solutions Reseller by the Eastman Kodak Company. Under the new agreement, IDT will provide Kodak's extensive portfolio of check imaging hardware and software solutions. With the agreement, IDT can now offer a broader range of professional services to community banks, credit unions, commercial organizations, state and local government agencies.

Kodak's new line of check imaging equipment makes it possible to quickly and easily convert paper checks to digital images for electronic transmission for processing and settlement. Now, financial institutions, businesses, and government offices can capitalize on the benefits of the Check Clearing for the 21st Century Act. Known as Check 21, the federal legislation removes the barriers to electronic check processing, setting the stage for checks to clear within hours instead of days.

Andy Lawrence, Worldwide Solutions Business Manager, Document Imaging, Graphic Communications Group, said, "Kodak is pleased to welcome IDT to our new Premier Solutions Reseller Program. IDT has a 14-year track record of success, and is ideally suited to offer our complete line of check imaging solutions. IDT has been a valued reseller of Kodak's Document Imaging solutions since 1998, and we look forward to our continued success."

Paul Szemplinski, President and CEO said, "We are excited to further our relationship with Kodak by becoming a Premier Solutions Reseller. As a provider of integrated content management, ERP and CRM systems and solutions, we actively work in conjunction with the best companies in the business to bring superior quality products and services to our customers. Our new agreement with Kodak will enhance the services and solutions we'll be able to offer to both our existing customers and future clients."

About IDT

IDT, Inc. (www.idt-inc.com) helps small, mid-market, and enterprise firms achieve maximum efficiency through enterprise content management, workflow automation, records management, ERP, CRM and line-of-business solutions.

From IDT Complete™, which allows customers to achieve both efficiency and compliance by integrating ERP and ECM, to pre-engineered IDT Pilot Packs™ that ensure quick return-on-investment through ECM, IDT uses phased and flexible integration of industry leading software applications to place the power of scalable systems at the client's fingertips.

IDT's full range of integrated offerings include software applications, hardware, and systems for scanning and imaging; services for document and materials conversion, storage, and electronic archiving; systems integration and support; and strategic consulting for quality assurance. IDT maintains a broad client base that includes local government and state agencies, life sciences and health care, manufacturing and distribution companies, and financial services and insurance organizations.
