Welcome to the December edition of IDT's *Integration Insider*

As 2006 winds down make sure you take the time to read this month's newsletter and spend some time planning for your 2007 technology investments.

Read on for the following:

- New IE7 Shaking Up CMS and Portal Implementations
- Automating Document-intensive Tasks with Workflow Software
- The new Kodak i860 production scanner
- Information about the Oracle acquisition of Stellent
- The announcement of Kofax Ascent Xtrata Pro
- Plasmon's introduction of an Enterprise Class Archive Appliance with Double the Capacity, Enhanced Security Features and Energy Efficiencies
- Other news and events from our partners

Happy Reading,

The IDT Team

**Learn more about
 Oracle's acquisition
 of Stellent.**

**Check out the new
 Kodak i860 color
 production scanner!**

**IDT Consulting Clients:
 Attend the "Year End
 Processing" Seminar
 on December 7th**

Put it to Work

New IE7 Shakes Up CMS and Portal Implementations

"CMS Watch" article by Tony Byrne and Janus Boye

"When Microsoft releases a major new version to a browser that still boasts 80-85% market share, web managers around the world need to take note. The good news is that Internet Explorer 7 ("IE7") is more standards compliant than its predecessor, but like all browsers, it has its own bugs and foibles. Perhaps more importantly, it is not IE6, a finicky browser for which software developers had developed special work-arounds, which may now break or need revision under the successor version.

As usual, this problem has both publisher and customer dimensions:

- Will IE7 affect the administrative and editorial capabilities of your CMS and Portal?
- Will IE7 muck up the rendered sites themselves?"

Automating Document-intensive Tasks with Workflow Software

How to Increase Profits and Simplify Compliance Efforts by Eliminating Paper from your Business Processes

Courtesy of Captaris

Today businesses are under tremendous pressure from customers, competitors and regulators to complete work better, faster and more cost-effectively while at the same time providing more transparency and security. With the plethora of documents organizations must process each day as they interact with customers and conduct business transactions, simply controlling all the paper can be a daunting task. That's why results-oriented organizations are putting workflow software in place that brings together people, processes and documents to improve efficiency, reduce costs and meet compliance requirements.

This white paper will discuss how automating document-intensive tasks with workflow software can improve your bottom line and protect your organization from a variety of risks. It will also showcase how real-world companies are gaining impressive results by using document workflow solutions in critical areas such as purchasing and claims processing.

Question:"We are looking for a production scanner that is 'lightning-fast' and has black & white, grayscale, and color capabilities. Can you recommend something?"

Answer: While we'd certainly need to discuss specifics with you, at a first glance it seems it'd be a great idea to check out the new Kodak i860 production scanner.

The new **Kodak i1860 Color Scanner** captures images at up to 200 pages per minute! It's the fastest production scanner offered by Kodak. Easy-to-use operation via a color touch screen panel provides on-the-fly performance with controls at your fingertips. A variety of ergonomic features: automatic height-adjustment, easy-to-reach input and output areas provides flexibility while standing or sitting.

Microsoft Announces New Version of Microsoft Dynamics CRM for 2007 Microsoft Office System and Windows Vista

Microsoft delivers powerful new user experience for better sales, marketing and service and introduces new licensing options for Microsoft CRM

MUNICH, Germany, Nov. 7, 2006 — Today at Convergence 2006 EMEA, Microsoft Corp. announced it will release a new version of Microsoft Dynamics™ CRM for the 2007 Microsoft® Office system and Windows Vista™ that enriches the user experience through enhanced productivity; data visualization; and communications, collaboration, and security features. Microsoft also announced that, in addition to being offered through Microsoft's standard Volume Licensing program, Microsoft Dynamics CRM will be offered through the licensing model that is used with Microsoft Dynamics enterprise resource planning (ERP) products, making it simpler and more convenient for customers and partners to buy and deploy a full Microsoft Dynamics suite solution that spans customer relationship management (CRM), financial management and supply chain management.
