News & Events →

Welcome to this edition of IDT's Integration Insider. As the first big Sarbanes-Oxley Act, Section 404 compliance deadline looms less than 6 months away, we thought it was time to revisit the Act and let you know what some technology companies are doing to help organizations with their "Sarboxing" efforts.

We've also included information about IP SAN technology, Microfilm/fiche conversion, the IDT eStore, the latest from Microsoft on how to deal with the Sasser Worm, and an i600 series announcement from Kodak.

As always, if you'd like more information about anything presented in the Insider, or if you have content suggestions, please [let us know!](#)

Happy Reading,  
The IDT Team

## Sarbanes-Oxley: The Role of Microsoft Business Solutions Technology in Supporting Compliance

By Stewart McKie ([www.cfinfo.com](http://www.cfinfo.com))

If you're an executive or operational manager, especially in IT or Finance, you'll want to be sure to check out this white paper. It offers a background of the Sarbanes-Oxley Act, insight into the three key sections in the Act (from a technology perspective), an overview of how business management technology from Microsoft can help provide a solid foundation for compliance, and what your organization should do now as preparation and first steps towards achieving compliance.

## **Proactively Manage Organizational Risk by Establishing Compliance Management Programs**

Microsoft isn't the only vendor focusing on solutions to assist with corporate compliance. Read on to learn more about the Acorde Compliance Suite.

"Given today's business and legal environment, many companies are establishing compliance management programs to proactively manage their organizational risk. Fueled by the increasing amount of regulatory, legislative, and corporate requirements instituted each year, the task of managing overall compliance for an organization has become a challenging endeavor. With the substantially heightened costs of compliance failure - including fines, litigation, and criminal penalties - companies are seeking solutions that provide them with a way to manage this mission-critical challenge."

## **Storage Area Networks for less than \$.01 per megabyte...is that really possible?**

Eric Vott, Assistant Vice President at Wells Fargo Bank says, "After evaluating both Fibre Channel and iSCSI, we were convinced that an IP SAN based solution made the most sense from a technology and cost standpoint."

Ken Walter's of PBS says, "Within 20 minutes, we allocated 100GB of storage on our IP SAN."

Why is it so simple and inexpensive?

**Question: "We've got microfilm and microfiche that we'd love to get converted to digital files but right now we just don't have the time or the staff to facilitate purchasing and installing a microfilm/fiche conversion system of our own. Any suggestions?"**

**Answer:** The good news is that there are options for completing data conversions without investing in a full system for your business, and the cost is likely far less than you'd think. The better news is that you don't have to look far to find a solution because we can help! IDT's Conversion Services can help you transfer your microfilm, microfiche and aperture cards to flexible digital formats and media. We can also help you with your paper to image conversion effort.

Whether you are faced with a pressing deadline, staffing or equipment issues, or the reality that you just need help from an expert, taking advantage of Conversion Services unleashes the power your vital data currently trapped in film or fiche and provides dramatic improvements in the productivity, security and efficiency of your organization's vital data.

**The IDT eStore is open for business!**

Check out the newly opened IDT eStore. Just go to [www.idt-inc.com/estore](http://www.idt-inc.com/estore) to register for an account or sign in as a guest to take a look around. You'll especially want to visit the "Special Offers" page for all the details on our great promotions and deals offering significant savings. As a registered user, you can create your own custom dashboard tailored to suite the needs of your personal shopping experience, request quotes, create shopping carts, compare products, place orders, save "favorite" products, and track your purchase history.

IDT's eStore accepts Visa, Mastercard, Discover, American Express or company issued purchased orders (with prior approved credit).

**Attention Government users:** IDT accepts government issued Visa and Mastercard

making your purchasing process that much easier. Log on to the [IDT e-store](#) to find out more!

### **Suffering from Sasser?**

Check out the latest update on the Sasser Worm and its variants on the Microsoft site by visiting: <http://www.microsoft.com/security/incident/sasser.asp>. Here, you'll be able to get information about the virus, learn how to protect your computer, automatically check for and remove Sasser and get in touch with a Microsoft support specialist if needed.

### **Kodak Announces Availability of New i600 Series Scanners**

"ROCHESTER, N.Y, May 13, 2004 - Eastman Kodak Company's Commercial Imaging Group today announced that its new line of high-speed digital document scanners, the KODAK i600 Series Scanners, are now shipping to customers worldwide. To support the new scanners, which convert paper documents to digital images, Kodak also announced the availability of KODAK Capture Software Version 6.4.

A family of three new scanners, the i600 Series offers exceptional price/performance, incredible image quality, super-fast image processing, reliable paper handling, and excellent ergonomics. The scanners offer five output options: bitonal; grayscale; color; simultaneous bitonal and grayscale; and simultaneous bitonal and color."
