Welcome to the November edition of IDT's *Integration Insider*

Be sure to check out this month's issue before your Thanksgiving break. This month we're thankful for articles about:

- Improving the speed, cost efficiency, and reliability of capture
- Providing employees with easy portal access to key performance indicators
- Ascent Payables for Invoices
- IDT Consulting's Year End Close Seminar
- The exciting, new IDT Referral Rewards Program that could earn you \$250
- and plenty of news from our partners

Happy Reading,

The IDT Team

IDT Consulting Clients: Attend the "Year End Processing" Seminar on December 7th

Improving the Speed, Cost Efficiency, and Reliability of Capture

Courtesy of Kofax

Excerpt: "Since its inception, image capture has evolved beyond the simple archival process. Today, instead of just electronically storing business data at the end of a process, companies now capture documents at the point of origin. The captured documents are used to automate the collection of business critical data.

As part of Kofax's effort to meet the image processing needs of our customers we have enhanced the speed, cost effectiveness, and reliability of Ascent Capture with the release of version 7.5."

Monitor your business health: Provide employees with easy portal access to key performance indicators

Inside your business management system is a dizzying amount of data to indicate how your company is performing right now. But how do you get the right information to the right people at the right time to make the right decisions?

Consider a business portal to serve precise, up-to-date information to those who need it. Portals can provide quick role-based access to vital business metrics via a Web browser, letting managers and others constantly monitor specific information. Personalized views of key performance indicators (KPIs) help decision-makers stay aware of ongoing conditions so they can make better, timelier decisions.

Ask the Expert

Question: I can't find information about Ascent for Payables on the Kofax web site. Where did it go?

Answer: Kofax recently renamed Ascent for Payables. It is now known as Ascent for Invoices. Not to worry, it's still the same great product that converts mounds of paper invoices into actionable digital data that's far easier for AP departments to locate, validate, process, transfer and store.

Get more information about Kofax Ascent for Invoices [here](#) or contact your IDT representative at 630.875.1100 or info@idt-inc.com.

Kodak Responds to Corporate Demands for High Speed Transactions with Company's Fastest Document Scanner and Upgraded Capture Software

KODAK i1860 Scanner Scores Early Orders with Productivity-Focused Speed and Design

ROCHESTER, NY — Oct. 5, 2006 — Eastman Kodak Company has introduced a new document scanner and an upgrade to its Capture Software, both designed to meet the high production needs of paper-intensive environments.

The KODAK i1860 Scanner captures images at up to 200 pages per minute, making it the fastest production scanner offered by Kodak. It was designed for maximum productivity, for customers like service bureaus, insurance companies that process claims in a central location, and financial institutions that handle volumes of transactions such as loan and mortgage applications. The scanner efficiently manages documentation with a wide variety of document sizes, colors, and weight.
