

Alaris INfuse Smart Connected Scanning Solution

Cloud-capable, PC-less, and IoT-ready

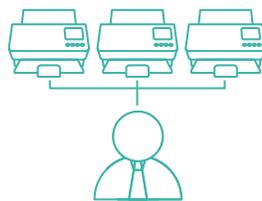

The Alaris INfuse Smart Connected Scanning Solution, powered by CAPSYS® CAPTURE ONLINE, can boost productivity and transform the way you work in multiple, positive ways. Driverless and PC-less, it's designed to efficiently onboard content into your specific business process. Now you can directly ingest documents and information and send exactly where you like, while receiving real-time acknowledgement at the point of scanning. Spend less time managing documents and more time managing your business.

Thanks to immediate exception notifications, missing forms, signatures, and other critical information issues can be caught and corrected instantly, saving you money and enhancing employee productivity. Using our customized connectors, easily scan to CAPSYS CAPTURE ONLINE. The INfuse Smart Scanning Solution improves how your business deals with important information — in-house or in the Cloud.

It's smart

- Simply scan one set-up sheet and you're up and running
- Access automated workflows
- No end-user training required
- Get finished image files directly from your scanner

It's connected

- Continuous monitoring with notifications
- Accurate delivery of data and metadata
- Seamless integration with your applications
- No on-site PC or software required

It's scalable

- Cloud-ready
- Modern, scalable architecture
- Enterprise-level security
- Tightly integrated with CAPSYS CAPTURE ONLINE
- Remotely managed by CAPSYS Technologies, LLC

From logistically challenging and slow... to fast, efficient, and secure: an INFuse Smart Solution success story

Challenge

For a large food distributor with on-premise commissary, paperwork is everywhere – much of it is mandated to maintain HACCP and FDA compliance. Extensive documentation is needed on everything from food safety inspections to damaged goods, driver's checklists to proof of deliveries and much more. Paperwork builds continuously as the chain operates multiple locations and warehouses, and delivers to grocers, restaurants, airlines, and other customers along the Eastern Seaboard.

Solution

To digitize this tsunami of paper and automate workflow, CAPSYS Technologies worked with Alaris to create a customized solution. A CAPSYS CAPTURE ONLINE connector was installed on the food distributor's INFuse AX Scanner to streamline document capture and distribution. With this new solution, the food distributor has slashed document-handling time from 40 to just 10 hours a month!

Results

1. Customized for the way the distributor operates

An employee at the distributor needs to process invoices daily. He simply walks up to the INFuse AX Scanner and loads over 100 invoices into the feeder at once.

2. Daily work simplified with greater peace of mind

The employee pushes an "Invoice Scan" button, tailored to match the appropriate AP workflow associated with each distribution location. All invoices go directly and securely into the CAPSYS CAPTURE ONLINE Cloud-based solution. The employee receives instant feedback to learn if the files were successfully received. PC- and driver-less scanning has been achieved.

3. Faster, more efficient workflow

With the CAPSYS CAPTURE ONLINE connector, daily scans now take just seconds to complete, allowing the employee to move onto other tasks.

4. Business processes accelerated

The distributor's custom CAPSYS CAPTURE ONLINE connectors have streamlined AP, AR, food safety inspection, and other critical business processes. They've also cut operational costs, enhanced employee productivity, and further solidified the firm's documentation for HACCP and FDA compliance.

CAPSYS CAPTURE ONLINE can be customized for many industries and applications

Retail Invoicing

Office Equipment Replacement

BPO/Service Bureaus

Human and Healthcare Resources

Insurance Records

Accounts and Taxes

Legal

Get connected with a smarter IoT solution

The INFuse Smart Connected Scanning Solution – teamed with CAPSYS CAPTURE ONLINE – addresses and solves multiple pain points for your operations. From easy set-up to accurate, reliable onboarding of content and instant notification of issues, it makes the entire capture process smarter and more efficient.
