

ECM + EMR = ONE COMPLETE PATIENT RECORD

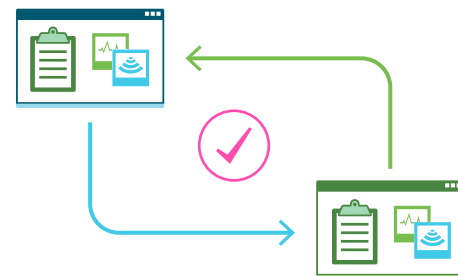

OnBase manages the “unstructured” information that your EMR does not. By integrating with OnBase, all of the information typically found outside of the EMR can be accessed from within the EMR, creating one complete patient record. Designed to work seamlessly with your EMR and your image archiving solutions of choice, OnBase helps to create an environment of care to keeps clinicians, patients – and your bottom line – happier.

+ INTEGRATE ECM WITH YOUR EMR

Improving patient outcomes through more informed care

- Creates one complete patient record
- Provides real-time access to patient information, when, where and how its needed
- Supports HIMSS Stage 7 and is Meaningful Use compliant
- Reduces risk of error

+ EXPEDITE DECISIONS WITH STREAMLINED PROCESSES

Utilizing business automation tools to improve productivity

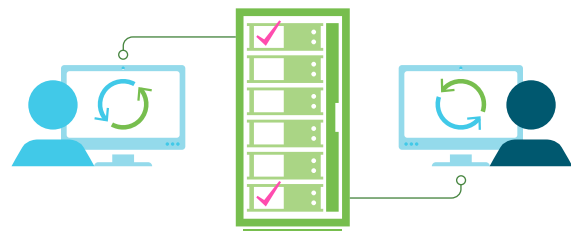

- Routes information electronically
- Increases collaboration
- Speeds revenue cycles
- Supports mobile access to information, anywhere, anytime

+ OPTIMIZE EXISTING SYSTEMS TO EXTEND VALUE

Creating a foundation for strategic initiatives today and tomorrow

- Fosters user adoption by keeping training to a minimum
- Adds value to current systems through increased functionality
- Requires minimal IT support and updates easily
