

Electronic Faxing - Financial Organizations

A Solution for Every Messaging Need

In today's fast-paced market, many financial organizations are looking to decrease transaction costs, streamline workflows, and increase automation while staying compliant with complex regulations. These enterprises need solution providers that can offer tight integration with legacy systems because of the inflexible nature of existing business technologies. As the first messaging company certified for both data centers and services for PCI / DSS (the Payment Card Industry Data Security Standard), Retarus understands the importance for compliance for both the security of organizations and their clients. Regardless of processing invoices or fine payments, tax filings, or other documents through fax communication, Retarus' platform provides specialized services to the financial industry, including enhanced security to protect personally identifiable information as required by Federal law. This provides organizations with the flexibility to securely distribute virtually any document from any application using a centralized fax and delivery solution.

Retarus Desktop Fax Services

Retarus offers a critical messaging service suite that provides a robust range of solutions that support enterprise faxing needs. With native integrations into email clients, such as Microsoft Outlook, Lotus Notes, Office 365, and Office applications, users can fax secure documents seamlessly from their desktop, thus minimizing errors, maximizing productivity and meeting GLB, SOX and PCI compliance standards.

Faxable documents like income tax forms and payment processing documentation are transmitted through Retarus, which eliminates error-prone, time consuming and repetitive manual processes.

Desktop Services

Mail2Fax: Send faxes from any email system

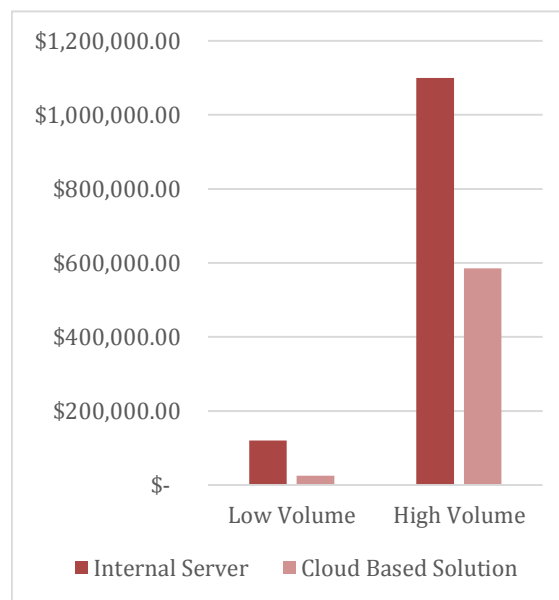

Fax-to-Mail: Receive faxes directly to a desktop or applications

Fax for Exchange/Notes: Native integrated solution for Microsoft Exchange/Lotus Notes

Faxolution for Windows: Send faxes from Microsoft Office or any other Windows application

Typical Scenario

Internal Fax Servers vs. Cloud-Based Solution

Managed Services can reduce total cost of ownership by up to 70% vs internal infrastructure like fax servers or fax machines

Electronic Faxing - Financial Organizations

Benefits for End Users

- Compliant with SOX, GLB and other Financial Regulations
- Sensitive personal information of clients transmitted securely to the intended recipient, not left in a shared space. Reduced risk of PCI related violations or information security breaches
- Secure and reliable transmissions with Never-Busy technology offers higher deliverability and throughput rates over legacy technology
- Redundant data centers guarantees uptime for critical messaging processing around the clock
- Detailed transmission reporting via web portal provides optimized delivery, receipt, and tracking of sent and received information for transparency
- Lower operational costs through centralized managed services
- Significant cost savings when compared to on premise equipment (MFDs, Fax Machines, Fax Servers)

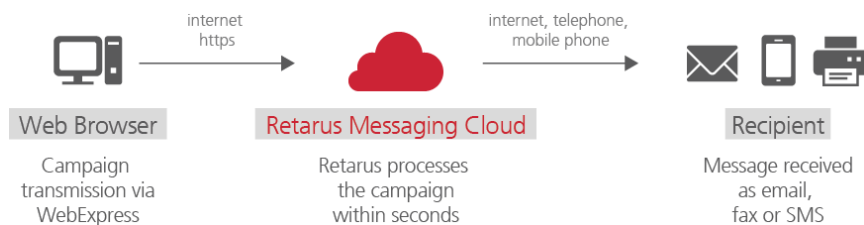

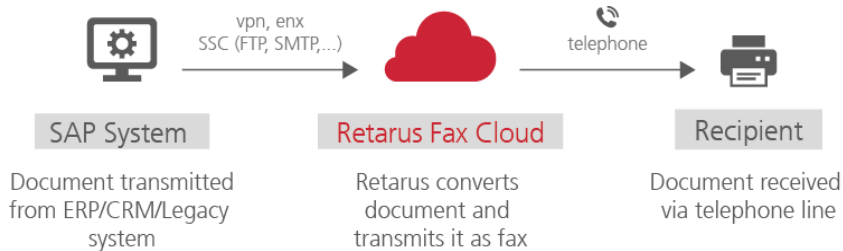

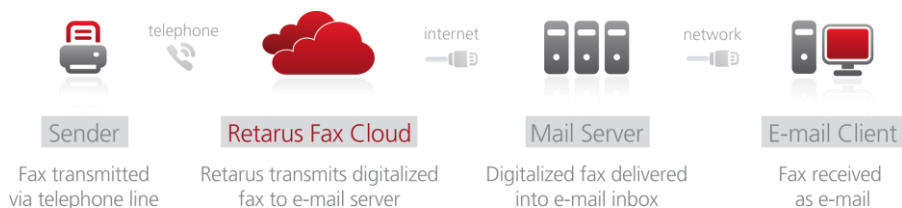

Retarus Applications Fax Services

Integrates with any business applications i.e. CRM, ERP, or legacy to send and receive critical messaging documents directly from business applications.

Faxolution for SAP completely replaces in-house fax services and requires no hardware, software, installation or maintenance. Certified by SAP, this service has the world's largest number of SAP connections – over 3,500 – outside of SAP itself.

Retarus WebExpress

Multi-modal web-based messaging broadcast tool, that enables Marketing, Sales, PR and other departments to send broadcast messages to a distribution list via email, fax, and SMS in a matter of seconds. With WebExpress, communicate investor relations, new product launches and alerts to those throughout your networks.

Why Switch to Electronic Faxing?

Improve Organizational Compliance // Increase Message Deliverability Rate //
 Greatly Reduce Operational Cost // Further Employee Efficiency // Provide Safer Transmissions
 Gain Higher Satisfaction and Trust from Clients
